

# waya by BIMsystems

Guide for registration and features

# Register on waya

Register for an account on waya.

<https://waya.bimsystems.de/>

To do this, click on "Log in" on the waya home page and then also "Register" if you are not already registered for free.

Then fill out the form and send it off. A short time later you should receive a confirmation link via mail.

Just follow the instructions in the mail.

To the free registration in waya

# Download the CAD plugin

Download and install the appropriate plugin for your CAD system (REVIT or ArchiCAD).

<https://bimsystems.de/de/plugin>

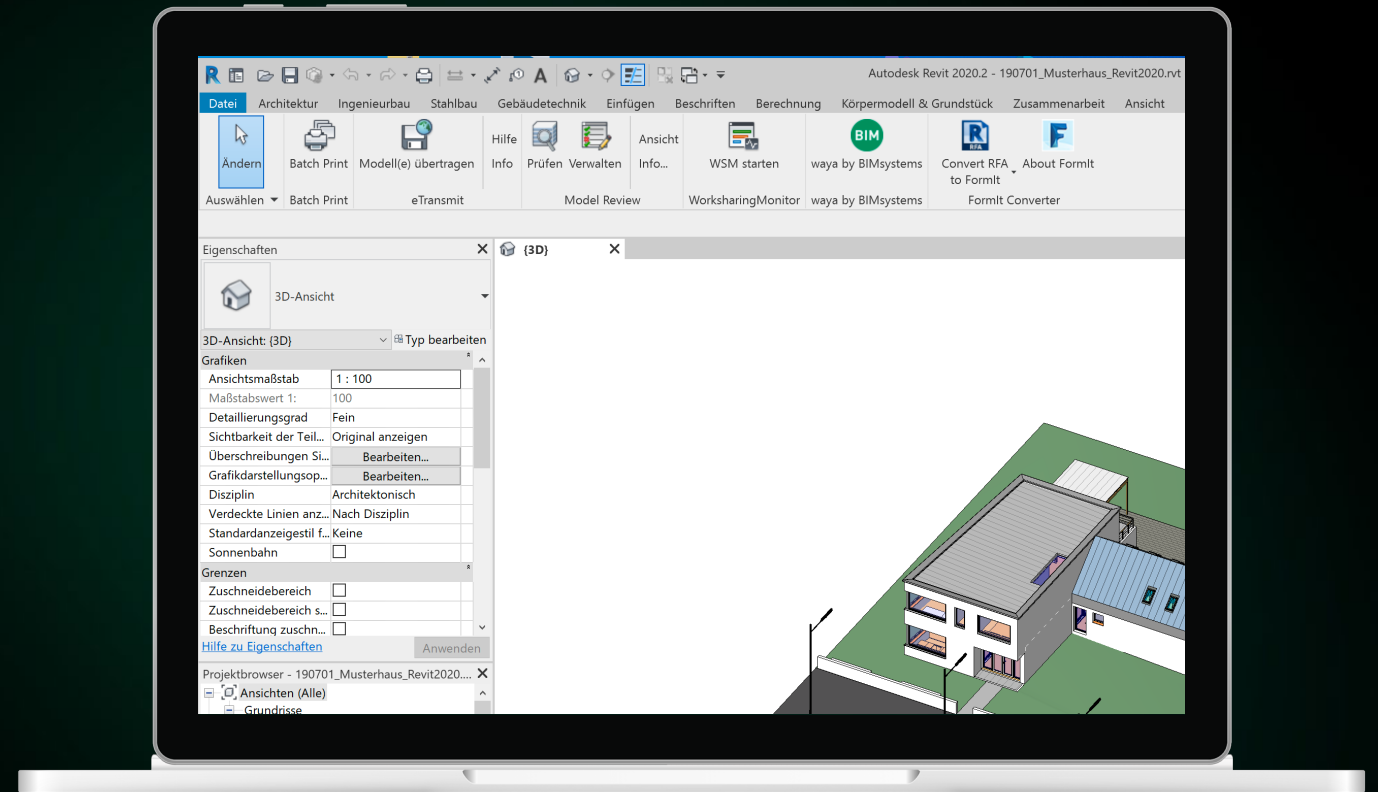

To the free plugin for your CAD system

# waya plugin for Revit

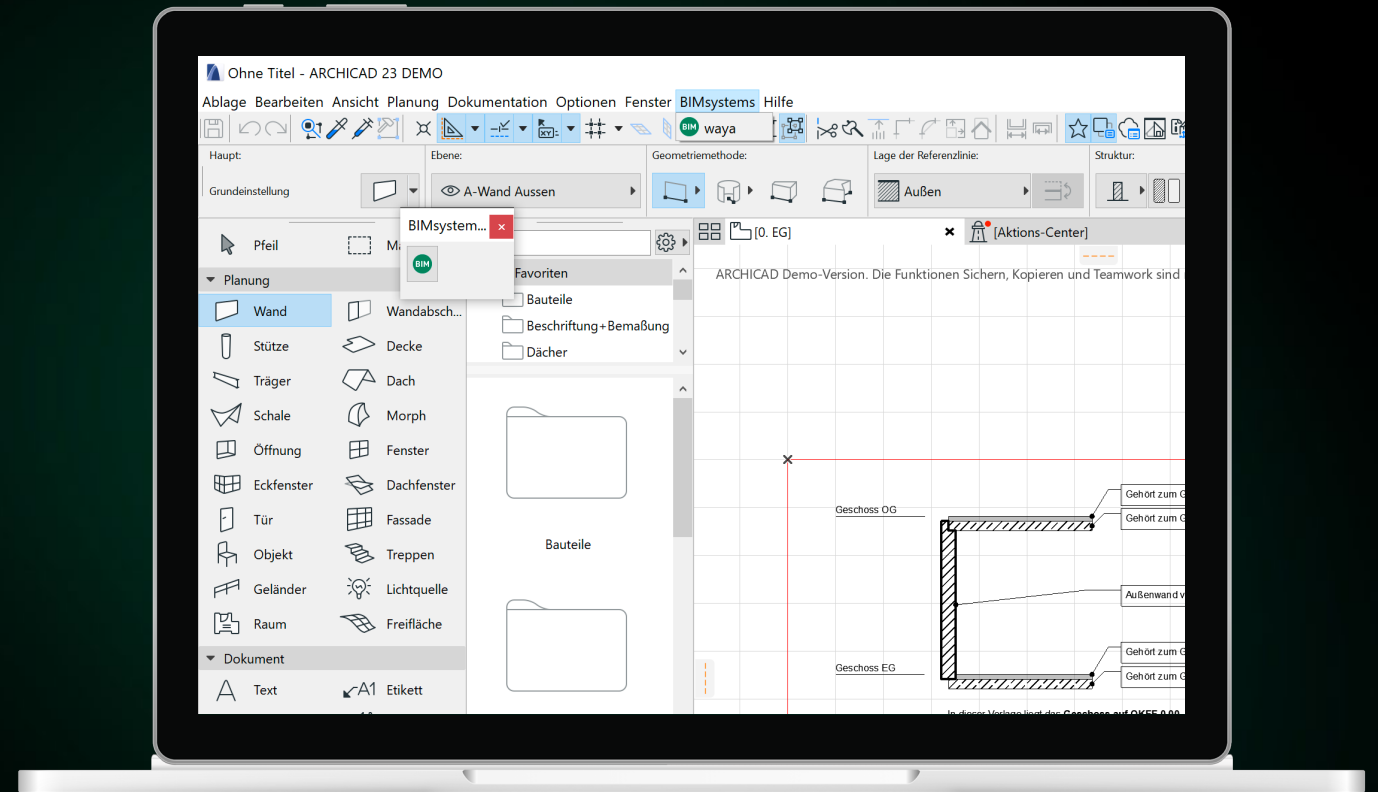

After installation, start the plugin under 'Additional modules'.

# waya plugin for ArchiCAD

1. After installation, open an additional tool window under 'BIMsystems'.
2. Start the plugin in the 'BIMsystems' tool window.

# For the quick search...

Use the search bar to directly find required manufacturers or (sub)categories.

# Everything in the right place...

In the categories you will find subcategories into which the BIM content is assigned. With one click you can expect a large selection of BIM content from various manufacturers in the selected category.

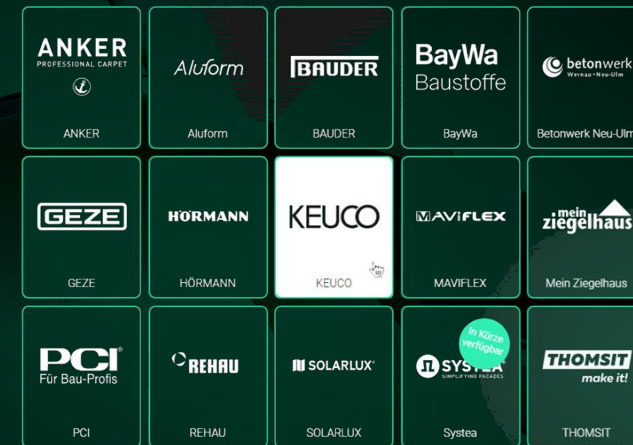

# Directly to our BIM content

Use the manufacturer tiles to access our portfolio directly. If a manufacturer tile is still marked with a "coming soon" seal, the manufacturer is currently building the BIM content. The newsletter will tell you when the product information will be available.

Are you missing a manufacturer? No problem! Under the tiles you can request manufacturers and we will approach the company for you.

Subscribe to the BIMsystems newsletter

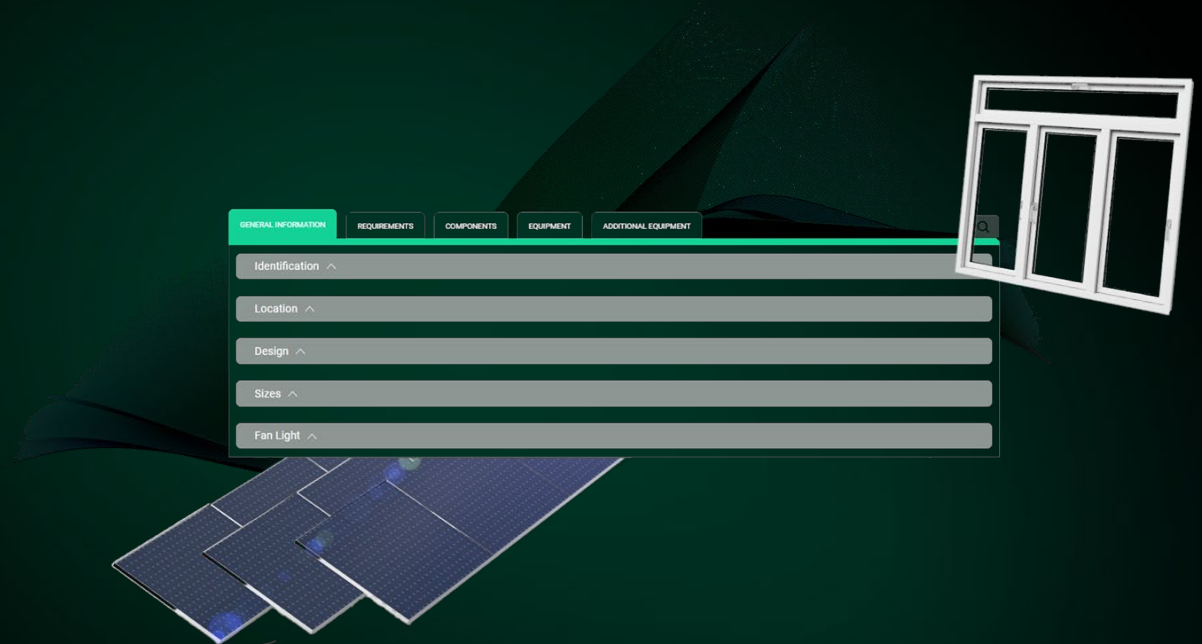

# Configure your BIM content

Configure your BIM content according to your project requirements. To do this, call up the desired information in the tab module.

Adjust the corresponding values in the fields or (de)activate properties using the checkboxes.

# Request object consultation

Is the right BIM content missing for your requirements? Then contact us directly from waya.

To do so, simply use the "Send e-mail" button in the manufacturer tile. A message window opens with the relevant information on the BIM content. Complete the messages with your BIM content requirements and send the request.

A colleague from object consulting will contact you shortly and provide you with the appropriate BIM content according to your requirements.

# Validate BIM content

To make sure that your configuration works, have your configuration validated.

A screenshot of a software configuration interface. At the top, there are five tabs: "GENERAL INFORMATION" (highlighted in green), "REQUIREMENTS" (with a red dot), "COMPONENTS", "EQUIPMENT" (with an orange dot), and "ADDITIONAL EQUIPMENT". Below the tabs is a search bar containing "Lorem Ipsum" with a dropdown arrow and a red dot. The main area displays a list of configuration items. The first section has a header "Lorem Ipsum" with a dropdown arrow and an orange dot. It contains three rows: the first row has "Lorem Ipsum" and a value of "5" in an orange box with a warning icon and the text "Lorem Ipsum dolor"; the second row has "Lorem Ipsum" and a URL "https://Lorem Ipsum/"; the third row has "Lorem Ipsum" and a URL "https://Lorem Ipsum.php". The second section has a header "Lorem Ipsum" with a dropdown arrow and a red dot. It contains three rows: the first row has "Lorem Ipsum" and a value of "5" in a box with a warning icon and the text "Lorem Ipsum"; the second row has "Lorem Ipsum" and a checked checkbox with the text "Lorem Ipsum"; the third row has "Lorem Ipsum" and a value of "5" in a box with a warning icon and the text "Lorem Ipsum".

# Place your BIM content

You are satisfied and your configuration is correct? Perfect! You can now transfer the BIM content to your data model by clicking on the "Place" button in the footer.

You see a button to download the plugin? Then you still need to download the free plugin.

# More information about the BIM content

Under "Downloads" you will find more information about the BIM content:

- technical data sheets
- operating instructions
- sustainability information
- certificates etc.

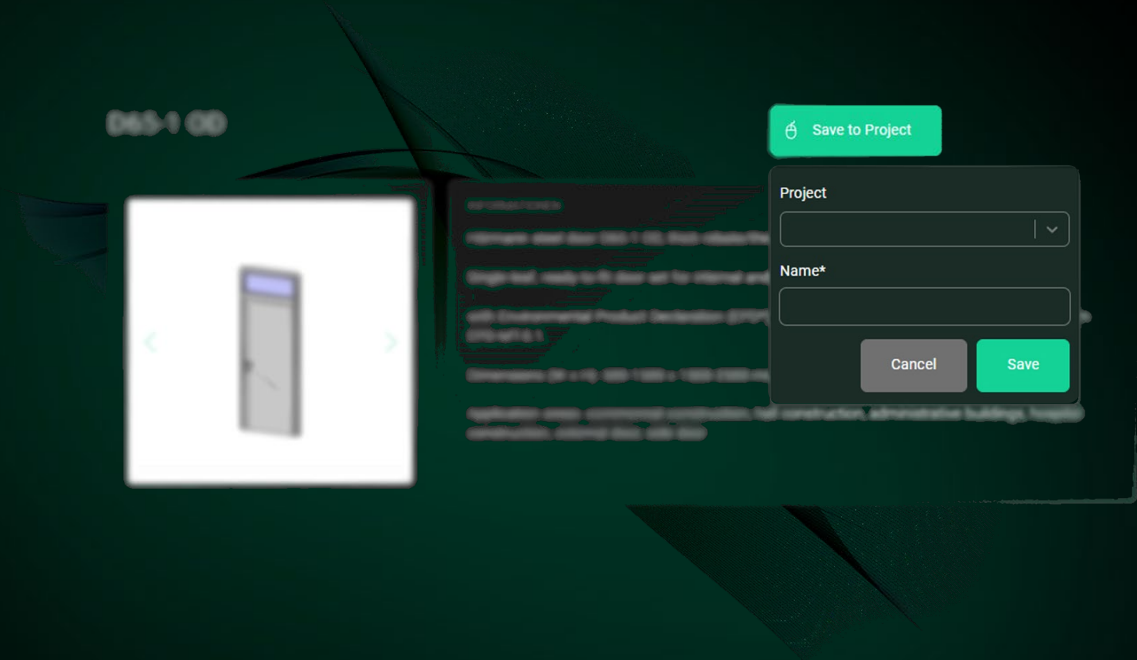

# Save your BIM content

To save BIM content for later, configure your BIM content according to your requirements and validate it. Then click the "Save to Project" button in the upper right corner.

Select your project in which you want to save the BIM content or create a new project. After saving your BIM content, you will find it under Projects > Project name > Favorites.

# Questions?

Do you still have questions? Is something unclear to you?

Then simply use the support function and describe your concern in your message. We will get back to you within 24 hours on weekdays.

In urgent cases, call us on weekdays at 0049 711 400 460 00 between 09:00 and 18:00.

The future has started!  
When will you do BIM?

# Contact.
